

## ? What are we learning about text and images?

Magazines, websites, newspapers, posters etc are now all made on a computer. Each includes text (words and numbers) and images (pictures) that have been placed onto the page to make it look as interesting as possible. We can add text and images to a page on a computer then use other tools to change the appearance (size, colours), to make the page look how we want it to.

### Key knowledge

1. Add, move and resize images. Add text and adjust size and placement.
2. Add, resize and place images on a page then add and position text to label and describe images.
3. Use word banks to write sentences about images.

	<p>Click this icon, choose a colour and then click the page to fill it the colour.</p>		<p>Use this icon to add text (letters or numbers), then type your own words. Drag the text box around the position it.</p>
	<p>Use this icon to add a sticker (a picture of a person etc).</p>		<p>Use these icons to change the size of the text.</p>
	<p>Drag the corners of the object to make it bigger or smaller.</p>		<p>Use this icon to change the colour</p>
	<p>Use this icon to delete an object you have added. Select it and then click delete.</p>		<p>A wordbank is a list of words about one thing, which we can use to make sentences.</p>
	<p>If you make a mistake, use this undo icon to go back a step.</p>
