Maths: Freddie Whittam

Learner: Tulisha Sharples

King's Coronation Art Show

Following last week's excellent School Coronation Party we have had lots of our King Charles inspired art work displayed in Tesco, Carnforth. Take a look at the great photos and well done to everyone who produced a work of art.

Hard work on SATs Week

Well done to Year Six who have worked really hard all term preparing for their SATs and who have all been superstars all week. These tests can create a lot of pressure if not undertaken in a careful and sensitive way so we thank Mr McGurk, Mrs Stocks and Mrs Spencer for their work preparing the children to do their very best.

Friday 19th - next week - is our termly Foodbank Friday collection. If you can donate something for the collection please send it in to school in the morning.

Dates and Events

May

Wednesday 17: Class 2 Scarecrows

Wednesday 17: Lego Science visit (KS2)

Friday 19: Foodbank Friday

WC Monday 22: Electricity Themed Science Week

Monday 17: End of year reports sent to parents

Tuesday 18: Leaver's Pizza and Rounders (4pm)

Wednesday 19: Leavers Assembly (2pm) and End of School Year.

Class Three Crag Science Visit

As part of their rocks Science theme this term, Class Three took a stroll up Warton Crag on Thursday. Ready for the weather, they managed to avoid the rain!

The Friends of Archbishop Hutton's School Association are a group of volunteers who meet once a term to plan fund raising events. All the money raised at events like the Christmas Fayre and the Easter Bingo goes straight back into school. In recent months we have purchased new reading books, contributed to the coaches for the Christmas pantomime trip and the rejuvenation of the school pond. We are always overwhelmed with the support the school community gives us at events and for this we are truly grateful. Here are some other ways that you can be involved with supporting school.

Support our Summer Social

We are always grateful for donations of:

- Tombola, Raffle prizes
- Teddys and bottles
- Volunteers to set up and pack away
- Stalls that sell crafts
- Pre-loved uniform in good condition
- Pre-loved toys in good conditions
- Come and have a great time supporting the school

Science Week - 22nd to 25th May 2023

The last week of term will be our annual Science Week. This year the focus will be investigating and electricity.

Here are three challenges for Science Week. Please choose one of the challenges and bring your work on Dress Like A Scientist Day (Thursday 25th)

We would like you to make a model, poster or booklet about an area of science. We would like you to research and create your project about either:

A famous scientist or inventor.

There are thousands of famous inventors and scientists. Do some research about them and then use your project to tell us all about their lives and their work.

An animal or dinosaur.

What is your favourite animal or dinosaur. Read about them, find lots of facts and then create your project to let other people know all about the animal's lifecycle, habitat and diet. Amaze everyone with something they didn't know before.

An incredible building or structure.

Maybe you like the Eiffel Tower, The Angel of the North, Tower Bridge or Stonehenge. Why not make a poster about your favourite structure or a fantastic model. Find out plenty of facts - who made it, how heavy is it, how tall is it - ready to impress your teachers, friends and family.

Your School Lottery

PLAY NOW
Just £1 per entry

Your School Lottery is a weekly lottery that raises money for school. Tickets cost as little as £1 a week. Each ticket consists of 6 numbers between 0 and 9 and every Saturday night there is a draw when a 6 digit winning combination will be picked. There is also a guaranteed winner from each school every Saturday. From every £1 ticket sold 40p goes to schools across the UK.
