Coronavirus information

Please read the corona virus information attached at the end of this newsletter.

In school we are following the national advice to make sure children use both handwashing and anti-bacterial gel to ensure good hygiene.

Scientific Superstars!

This half-term the Natural World is the Science focus for each class' curriculum theme: Class 1 and Class 2 are learning about the seasons, animals & plants and their habitats; Class 3 will be classifying animals & plants and exploring different habitats; Class 4 will be studying the Solar System and Light.

Class 2 have already been up to Warton Crag on Thursday to look at nest materials the local birds use. The children did some birdwatching and were fortunate to see a peregrine falcon, a buzzard, jackdaws, ravens, jays and wood pigeons amongst others. They also noticed a large bird box for owls. Class 1 are heading up to the Crag next week – weather permitting!

Download this free app!

Word Hippo is a free app that includes a thesaurus and various word tools. The children use word hippo in school to check spellings, find meanings of words, look up alternative and opposite words.

**Your dog can't clean up after itself,
It's up to you!**

One of Lancaster City Council's dog wardens popped in to school before half-term.

She asked us to share the information attached at the end of this newsletter about their fixed penalty scheme.

Advice on the coronavirus for places of education

How serious is the coronavirus?

- it can cause flu-like symptoms, including fever, cough & difficulty breathing
- the infection is not serious for most people, including children
- there is currently no vaccine
- most people get better with enough rest, water to drink and medicine for pain

How likely are you to catch the virus?

- you can only catch it if you have been close to a person who has the virus
- the chance of being in contact with the virus is currently low in the UK
- if you have travelled to areas where many people are infected, your chance of catching the virus is higher, i.e. China and any affected areas

How can you stop coronaviruses spreading?

If you need to cough or sneeze

Catch it with a tissue

Bin it

Kill it by washing your hands with soap & water or hand sanitiser

You should wash hands with soap & water or hand sanitiser

After breaks & sport activities

Before cooking & eating

SCHOOL ETC.
On arrival at any childcare or educational setting

After using the toilet

Before leaving home

Try not to touch your eyes, nose, and mouth with unwashed hands

Do not share items that come into contact with your mouth such as cups & bottles

If unwell do not share items such as bedding, dishes, pencils & towels

Stop germs spreading with our e-Bug resources on hand and respiratory hygiene lesson plans for KS1, 2 and 3: campaignresources.phe.gov.uk/schools

What should you do if you feel unwell?

Keep away from others and stay at home to stop the infection spreading. Avoid public transport if you think you have symptoms of coronavirus. If you become unwell at a place of education, tell a member of staff and let them know if you have travelled to any other countries in the last 14 days.

If your staff member or parent thinks you have symptoms of coronavirus, they should call **NHS 111** for advice. Follow the UK Government advice for childcare or educational settings [gov.uk/government/publications/guidance-to-educational-settings-about-covid-19](https://www.gov.uk/government/publications/guidance-to-educational-settings-about-covid-19). Parents can visit [NHS.UK](https://www.nhs.uk) to find out more information. Teachers and support staff should follow the UK Government advice.

Staff, students and pupils who have returned from Wuhan and Hubei Province in China should self isolate, and NOT attend education or work for 14 days. See [NHS.UK](https://www.nhs.uk) for advice on coronavirus.

If there is an emergency, call 999 immediately
